Code System Names	ADA Universal Tooth Designation System
URL	TBD
Introduction	<p>The American Dental Association (ADA) accepted the Universal/National Tooth Designation System and the ISO/ANSI/ADA Specification No. 3950 for Designation System for Teeth and Areas of the Oral Cavity as the human tooth and oral cavity enumeration schemas in 1994.</p> <p>The universal tooth designation or numbering system is accepted and approved by the ADA and is the most commonly used system used by dental professionals in America.</p> <p>Permanent teeth are numbered 1-32, starting with the third molar (1) on the right side of the upper arch, following around the arch to the third molar (16) on the left side, and descending to the lower third molar (17) on the left side, and following that arch to the terminus of the lower jaw, the lower right third molar (32).</p> <p>Supernumerary teeth in the permanent dentition are identified by the numbers 51 through 82, beginning with the area of the upper right third molar, following around the upper arch and continuing on the lower arch to the area of the lower right third molar (e.g., supernumerary #51 is adjacent to the upper right molar #1; supernumerary #82 is adjacent to the lower right third molar #32).</p> <p>Primary Teeth are lettered A-T, starting posterior part of the upper right quadrant where the right second molar tooth is assigned the name A, and follows around until letter J, the left second molar on the left posterior side of the dental arch. Tooth (K) is the mandibular right second molar tooth and lettering continues to deciduous mandibular right second molar tooth (T).</p> <p>Supernumerary teeth in the primary dentition are identified by the placement of the letter "S" following the letter identifying the adjacent primary tooth (for example, supernumerary "AS" is adjacent to "A"; supernumerary "TS" is adjacent to "T").</p> <p>The Universal Numbering System can be found in the ADA Dental Claim Form. For more information see here: <a href="https://www.ada.org/publications/cdt/ada-dental-claim-form">https://www.ada.org/publications/cdt/ada-dental-claim-form</a>.</p> <p>The associated International Organization for Standardization (ISO) designation system for teeth (ISO/3950) is included to assist with mapping and should not be used on the ADA Claim Form.</p>
