

DIRECT REIMBURSEMENT

Dear Dental Patient:

Did you ever imagine that your Direct Reimbursement dental plan could offer so many benefits?

- It's easy to understand.
- Your reimbursement is based on the dollar amount you spend on dental care, not based on the type of treatment you receive.
- It offers you complete freedom to choose any dentist for your treatment.
- There are no preauthorization requirements.
- It gives you and your dentist the power to decide your course of treatment, with no limitations from a third-party insurer.

Because of these reasons, the American Dental Association strongly supports the Direct Reimbursement concept. More information can be found by logging on to www.ada.org/DR. Thank you.
