<p>General Licensure Requirements</p>	<p>New Mexico Statutes, Chapter 61, Professional and Occupational Licenses Article 5A Dental Health Care 61-5A-12. Dentists; requirements for licensure; specialty license. A. All applicants for licensure as a dentist shall have graduated and received a degree from a school of dentistry that is accredited by the commission on dental accreditation and shall have passed the written portion of the dental examination administered by the joint commission on national dental examinations of the American dental association or, if the test is not available, another written examination determined by the board. B. Applicants for a general license to practice dentistry by examination shall be required, in addition to the requirements set forth in Subsection A of this section, to pass a test covering the laws and rules for the practice of dentistry in New Mexico. Written examinations shall be supplemented by the board or its agents by administering to each applicant a practical or clinical examination that reasonably tests the applicant's qualifications to practice general dentistry. These examinations shall include examinations offered by the central regional dental testing service, northeast regional board of dental examiners, southern regional testing agency or western regional examining board or any other comparable practical clinical examination the board approves; provided, however, that the board may disapprove any examination after it considers compelling evidence to support disapproval. Upon an applicant passing the written and clinical examinations and payment in advance of the necessary fees, the board shall issue a license to practice dentistry. C. The board may issue a general license to practice dentistry, by credentials, without a practical or clinical examination to an applicant who is duly licensed by a clinical examination as a dentist under the laws of another state or territory of the United States; provided that license is active and that all dental licenses that individual possesses have been in good standing for five years prior to application. The credentials must show that no dental board actions have been taken during the five years prior to application; that no proceedings are pending in any states in which the applicant has had a license in the five years prior to application; and that a review of public records, the national practitioner data bank or other nationally recognized data resources that record actions against a dentist in the United States does not reveal any activities or unacquitted civil or criminal charges that could reasonably be construed to constitute evidence of danger to patients, including acts of moral turpitude. D. The board may issue a general license to practice dentistry by credentials to an applicant who meets the requirements, including payment of appropriate fees and the passing of an examination covering the laws and rules of the practice of dentistry in New Mexico, of the Dental Health Care Act and rules promulgated pursuant to that act, and who: (1) has maintained a uniform service practice in the United States military or public health service for three years immediately preceding the application; or (2) is duly licensed by examination as a dentist pursuant to the laws of another state or territory of the United States. E. The board may issue a specialty license by examination to an applicant who has passed a clinical and written examination given by the board or its examining agents that covers the applicant's specialty. The applicant shall have</p>
